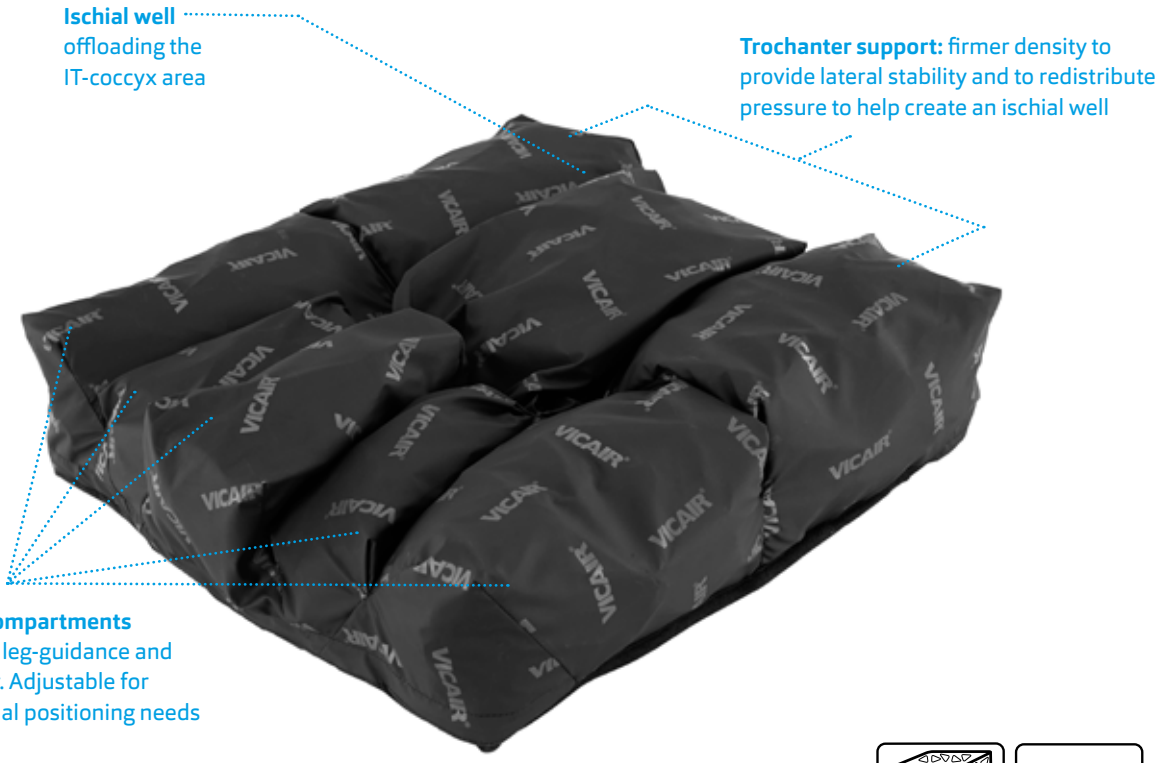
VICAIR® VECTOR

NEW LOOK

OFFLOADING THE IT-COCCYX AREA



READY FOR USE

PRESSURE ULCER TREATMENT

High quality pressure redistribution due to the combination of immersion and offloading

Eight adjustable compartments for maximum stability

Extra positioning of the upper legs

Sometimes it is necessary to offload the vulnerable area around the IT's (sitting bones) and coccyx (tailbone). The Vicair Vector does just that. It's unique compartment layout further provides comfort, optimal skin protection, excellent leg guidance and extra pelvic stability. The Vector offers support where needed, resulting in improved functionality of the upper body and expanding reach.
