

Active Chairs

Ergonomic chairs for activity and participation

VELA Tango 100 & 200 El

ELECTRIC HEIGHT ADJUSTMENT

VELA Tango 100El

VELA Tango 100El's low backrest supports the lower back and allows free movement of the back, shoulders and arms during various activities.

VELA Tango 200El

VELA Tango 200El is well suited for people who need comfort and a high backrest. The seat is bigger, the backrest is higher than the one on VELA Tango 100, and the backrest can be locked at a fixed angle.

VELA Tango is a series of work chairs developed to enable the user to keep the usual level of activity and independence at home and at the work place – despite disability. The electrical height adjustment makes it possible, e.g., for people with mobility problems to get up

and sit down on their own or reach the top cupboard while sitting in the chair. A unique central brake ensures that the user has a stable workplace, which means, that working in the kitchen with knives or boiling water is safe.

VELA Tango 510

NEW

T3 backrest and T3 neck support

VELA Tango 510

(Foot bar, ES5 backrest and SW neck support are available as accessories)

High backrest that can be adjusted in height and angle and an adjustable neck support provide the user with good support for the back and head when the chair is tilted in a resting position.

VELA Tango 510 is the latest development in work chairs. In addition to an active sitting position, the chair also offers relief and a good resting position over the course of the day, which people with disabilities often need to provide variation and relief from the active sitting position. In addition to the well-known benefits and options of an active work chair, VELA Tango 510 has a high back, neck support and a large tilting seat, which offers the unique possibility of a varied, ergonomic sitting position or relief and rest.

VELA Tango 500

ES5 backrest and SW neck support

VELA Tango 500El with medium ALB backrest

(The foot bar can be purchased as an accessory)

The Active Lumbar Backrest (ALB) is a unique two-part, ergonomically-shaped backrest. It consists of a lumbar support and a back support, which can be individually set for optimal support of the back and lumbar area. The ALB backrest is available in small, medium and large.

VELA Tango 500 is the latest development within work chairs, which, in addition to the work chair's other, well-known benefits, has a revolutionary, two-part ALB backrest. The ALB backrest provides a high level of support for an active and varied, ergonomic sitting position for people with disabilities who require extra comfort, support and safety. VELA Tango 500 therefore aids mobility, activity and participation in everyday activities as well as in the workplace for those with a disability.
